WORK EXPERIENCE

Samsung Electronics
Noida
Software Engineer
April 2019 –Present

• Working on Spring & hibernate framework for backend development of knox configure service which provides customization, automated enrollment and security to devices.
• Developed automation test script in Groovy for server APIs which reduced regression time by 30%
• Experience on REST-APIs, Java & familiarity with agile methodology & product development life cycle.
• Worked on backend of Service Health Status web portal using Spring Boot, Maven, MongoDB which provides IOT services running execution status at 4 geographical regions.
• Involved in designing & maintenance of existing web services for monthly feature release of product.
• Created regression run Jenkins Job of metadata service to reduce dependency on testing team.

Project – Intelligent Target System
An AI based tool to filter relevant test scenarios included in product feature list.
• Designed REST-APIs to execute python script and user interface dashboard.
• Technology: Spring Boot, JSP, MySQL.

Accenture
Noida
Associate Software Engineer
Aug 2018 – Mar 2019

• Contributed as ABAP-developer in backend development team.
• Worked on code debugging, capturing and deploying fix to customer issues.

EDUCATION

B.E – Computer Science
July 2014 - Jun 2018
Madhav Institute of Technology & Science
Gwalior
C.G.P.A – 7.3

Takshashila Senior Secondary School
Senior Secondary (C.B.S.E.) - 86.4 %
High School (C.B.S.E) - 9.8/10.0 CGPA

TECHNICAL SKILLS

Worked On-
Programming Languages: Java, C++, Groovy Script
Technologies: J2EE (Servlets, JDBC, JSP), REST APIs, HTML, CSS (basic).
Frameworks: Spring, Spring Boot, Hibernate
Database: MySQL.
Tools & IDE: Git, Jenkins, JIRA, Maven.
Familiar with - CSS, C, PostgreSQL.
Interested In - AWS, Microservices, data Structures & Algorithms.

ACADEMIC PROJECTS

Friend Tracker (Major Project: March-May 2018)
A tracking android application to track location by registered mobile number, date and time.
Technology used: Java Servlets, Android, JSON, HTML, JavaScript & MySQL.
Repo Link - See Project

Hostel-Helpdesk
A web application portal for hostel students to register their complains and related queries to administration anonymously.
Technology used: Java Servlets, JSON, HTML, JDBC, JavaScript, CSS & MySQL.
Repo Link - See Project

ACHIEVEMENTS
